DOB: 15th December 2002 | laxya.pahuja8@gmail.com

EDUCATION

Manipal Institute of Technology — Manipal, Karnataka
*Bachelor of Technology in Computer Science Engineering - CGPA: **8.62**; Most recent GPA: **9.55*** — *October 2021 - June 2025*

Amity International School — Gurugram, Haryana
*CBSE — 12th: **95.8%** and 10th: **97%*** — *Graduated Batch of 2021*

EXPERIENCE

TechBrig — May 2024 – July 2024
Intern - Tech Associate — *Gurugram, Haryana*
- Worked on making a recruiter dashboard for one of their biggest clients, Axiom Global Technologies which helps them track individual recruiter's performance
- Set up automatic email alerts for Axiom to notify them about various checkpoints and help make sure every requirement is satisfied in due time
- Designed a platform that generates automated reports which was a recurring task needing to be done manually up until now

BugBase — February 2022 – May 2024
Intern - Motion Design & Web Development — *Bengaluru, Karnataka*
- Worked on developing the employee portal for over 30+ employees using **Next.js** and **Node.js**
- Make attractive animated motion graphics infotainment videos and outreach ads for a community of over **1000+** ethical hackers
- Edit weekly Instagram reels for community outreach and marketing

PROJECTS

COVICoin | *Node.js, Express.js, MongoDB, Twitter API* — 2021
- Developed a gamified web platform that shows the tweets requesting **COVID** resources to users so they can help them and earn redeemable credits accordingly
- **Runners Up** at FrostHack, **Indian Institute of Technology**, Mandi

Know Your Traveller | *Node.js, Express.js, MongoDB* — 2021
- Developed an Android app that helped in connecting travellers and travelling agencies for safer post-**COVID** travel
- Making a unified database for passports and vaccine certificates like the Aadhaar campaign
- Selected as **National Finalist** at **Microsoft Imagine Cup** 2021

folio | *Next.js, Spotify API, GitHub API, Express.js, MongoDB, ChatGPT API* — 2023
- Developed a platform that lets users turn their resume into a personal portfolio website with real-time social integrations
- Around **500+ people** signed up on the waitlist
- Around **200+ active users and live portfolios** on the website

CoDiff | *Typescript, VSCode API, socket.io* — 2021
- Developed a **VSCode** extension that has live access to all your teammates' local changes, greatly improving communication: it notifies you of conflicts with teammates as they occur
- Utilized polka for running local servers, axios for fetching data, socket.io for real-time communication between users, and tmp for temporary file management

Mapcident | *Node.js, MapMyIndia API, GeoLocation API, socket.io* — 2022
- Developed a web app that uses your phone's **accelerometer** to detect accidents and automatically contacts emergency services

TECHNICAL SKILLS AND COURSEWORK

Languages: Java, Python, C, SQL, JavaScript, TypeScript, HTML/CSS
Frameworks: React.js, Node.js, Next.js, Express.js, MongoDB, Svelte, Tailwind, Android Studio, Firebase

EXTRACURRICULAR

Google Code In | *Runners Up* — 2019
- Contributed and completed over **50** tasks for the open-source organisation, **The Mifos Foundation**
- Tasks involved fixing bugs in their mobile application and implementing new features
